

# Visual Recommendation and Visual Search for Fashion E-Commerce

**Alessandro Abluton**  
alessandro.abluton@unito.it - Università di Torino

Recommender System are **costly to implement**, small industry players are cut out. **Reccomandations-as-a-Service** provide users with a wide set of RS easily pluggable in any e-commerce.

**Visual search:** users can upload a picture and search for the most similarity items

**Visual recommendation:** recommend items based on image similarity
